W

Latitude

45.46630

Longitude

-110.98400

Notes

Skiers in Hyalite saw a natural wet <u>slab</u> near Blackmore Lake. From the email: "The <u>slide</u> was located around 300 yards South of Blackmore Lake on a West facing slope at an elevation just above 7400 feet. It broke below a cliff band about 3' deep (to the ground) and ran a few hundred feet (almost to the skin t<u>track</u>." Photo: JR Mooney
