

Skier triggered small wind slab

Maid of the Mist

Northern Gallatin

3/26/2019

Code

SS-ASc-R1-D1-I

Elevation

10000

Latitude

45.41230

Longitude

-110.98800

Notes

From an email: "Small cross loaded slopes were easy to [trigger](#). None were very large, but I did kick off numerous small windslabs on multiple aspects. Some large cornices were starting to detach from ridges along Mt. Bole and in the Maid of the Mist area. Numerous had fallen recently and created sizable debris piles. Attached is a picture of one of the cross-loaded ribs that I triggered while skinning by."

Number of slides

1

Number caught

0

Number buried

0

Avalanche Type

Soft slab avalanche

Trigger

Skier

Trigger Modifier

c-A controlled or intentional release by the indicated trigger

R size

1

D size

1

Bed Surface

I - Interface between new and old snow

Problem Type

Wind-Drifted Snow
