

HS:142 Layer Notes:
105-100cm: **Avy broke here**
105-100cm: **Problematic layer**
65-63cm: **Deeper slides possible**

Lower ECTP21 on facets broke when I put shovel behind column to shear off first ECTN. Recorded as ECTP because it collapsed a extra force when shovel was placed behind column (estimated ECTP 21).
