

Many natural and skier triggered wind slabs in Bridgers

Bridger Range

3/10/2020

Code

SS-AS

Aspect

E

Latitude

45.77010

Longitude

-110.94000

Notes

Observations from Bridger Ski Patrol:

"At 10:30 am natural avalanches were reported Between the Peaks of Saddle, in Argentina Bowl, and on Bridger Peak. At 11am a solo skier [triggered](#) an avalanche on the north peak of Saddle with a [ccornice](#) drop. Shortly after, skier triggered avalanches were reported to the north, in Peter's Point, and Barny and Gibbs."

From a skier:

"Really touchy windslab formation throughout the day. 6-12 in slabs running on freeze crust."
