

West facing slope, Hyalite canyon

NORTHERN GALLATIN RANGE

Northern Gallatin

12/20/2020

Code

SS-N

Aspect

W

Latitude

45.43380

Longitude

-110.92500

Notes

From obs: "We were ice climbing below Divide Peak today. I heard and saw a natural avalanche across the basin on the west facing slopes below Overlook Mountain, I also observed recent avalanche debris below "The G Spot" which is in a couloir^{coul} below Overlook. Even though there isn't any recent snow, the snow that is there is getting actively blown around."

Number of slides

1

Number caught

0

Number buried

0

Avalanche Type

Soft slab avalanche

Trigger

Natural trigger

Problem Type

Wind-Drifted Snow
