

Numerous wind slab avalanches around Cooke City

COOKE CITY

Cooke City

12/23/2020

Code

HS-N

Latitude

45.02020

Longitude

-109.93800

Notes

Riding north of Cooke City we saw numerous natural [wind slab](#) avalanches on Sheep Mountain, Miller Mountain, Wolverine Peak, Mt. Abundance and near Goose Lake. These avalanches mostly appears to have have broken during the storm, but the [sliden](#) Miller appeared to be fresh this morning.,

All the slides broke underneath newly wind drifted snow. Most of these slides were small, but several broke 300-500 ft wide and ran 500-1000 vertical ft. Crowns were generally 1-3ft deep, with a couple breaking into much deeper drifts.

Number of slides

10
