Layer note

Fri Nov 30 15:00:00 MST 2012

Air Temperature: **C**

Stability Test Notes:

80-86: Pro

Beartooth, MT

Co-ord: **45.06963 N 109.94456 W**

Sky Cover:

Elevation (ft) **9673**

Slope: **26**

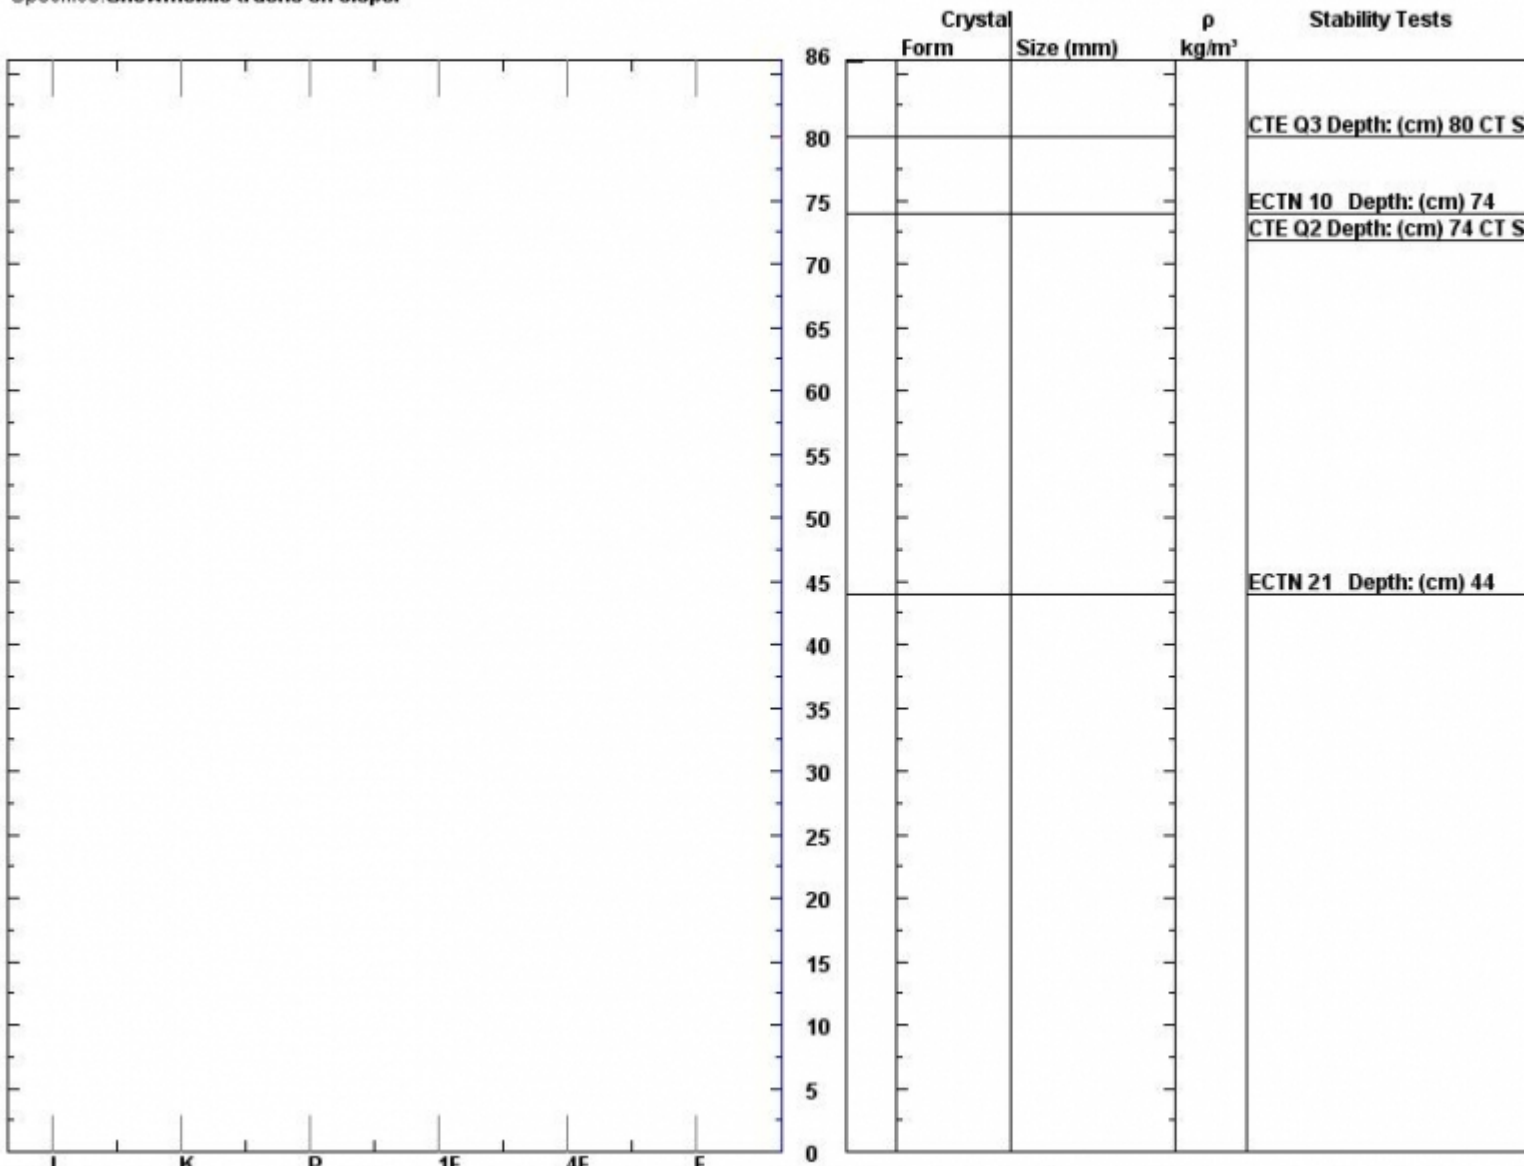

Precipitation:

Aspect: **193**

Wind loading: **no**

Wind:

Specifics: **Snowmobile tracks on slope.**

Notes: This pit was dug on Scotch Bonnet Mountain in a meadow lookers right of the Rasta 1/2 chute. It is very similar to a nearby pit on a East aspect there are more crust. Overall a varm, dense, and strong snowpack. Also it is a right side up snowpack with hard snow at the ground.
