Snow Pit Profile

Bridger, MT

Aspect:

Observer: Mark Staples

Fri Dec 21 11:25:00 MST 2012

Co-ord: 45.80746 N 110.93214 W

Elevation (ft) 8589

Slope: 31

Wind loading:

Stability on similar slopes: Good

Stability Test Notes:

Layer note

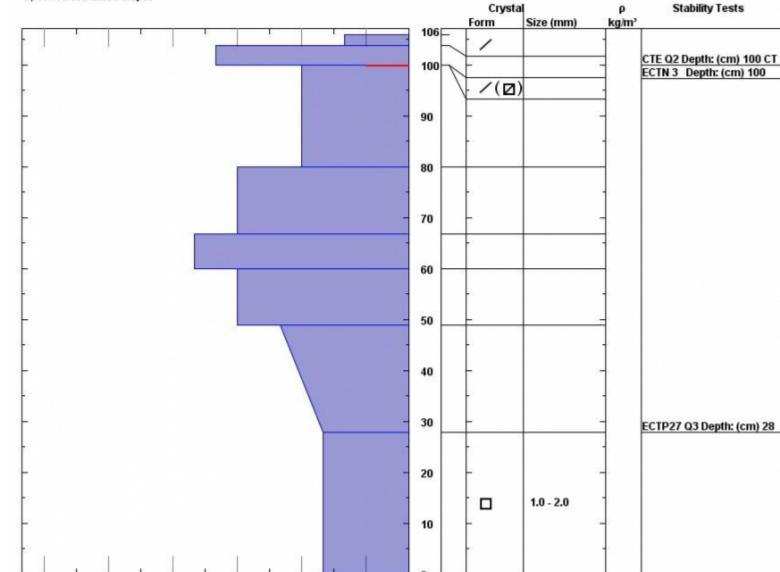

100-100: F

Air Temperature: C

Sky Cover: Precipitation:

Wind:

233 Specifics: We skied slope.

I K P 1F 4F F
Notes: West side of Bridgers in the St. Lawrence area of Truman Gulch. Not very concerned about facets at 28cm. Main concern is nsf's. In other area the surface. Skinning was "slippery" due to the nsf's. I don't expect to see natural avalanches on facets at 28cm. Human triggered avalanche facets will be possible if you hit the right spot and the ECTP was very rough.
