

Snow Pit Profile  
Above Fairy Lake

Northern Bridgers, MT

Elevation (ft)

Aspect: 52

Specifics: We skied slope.

Observer: Chris Bilbrey

Sat Nov 02 14:50:00 MDT 2013

Co-ord: N W

Slope: 32

Wind loading: no

Stability on similar slopes: Very Good

Air Temperature: 4 C

Sky Cover: sky < 2/8 covered

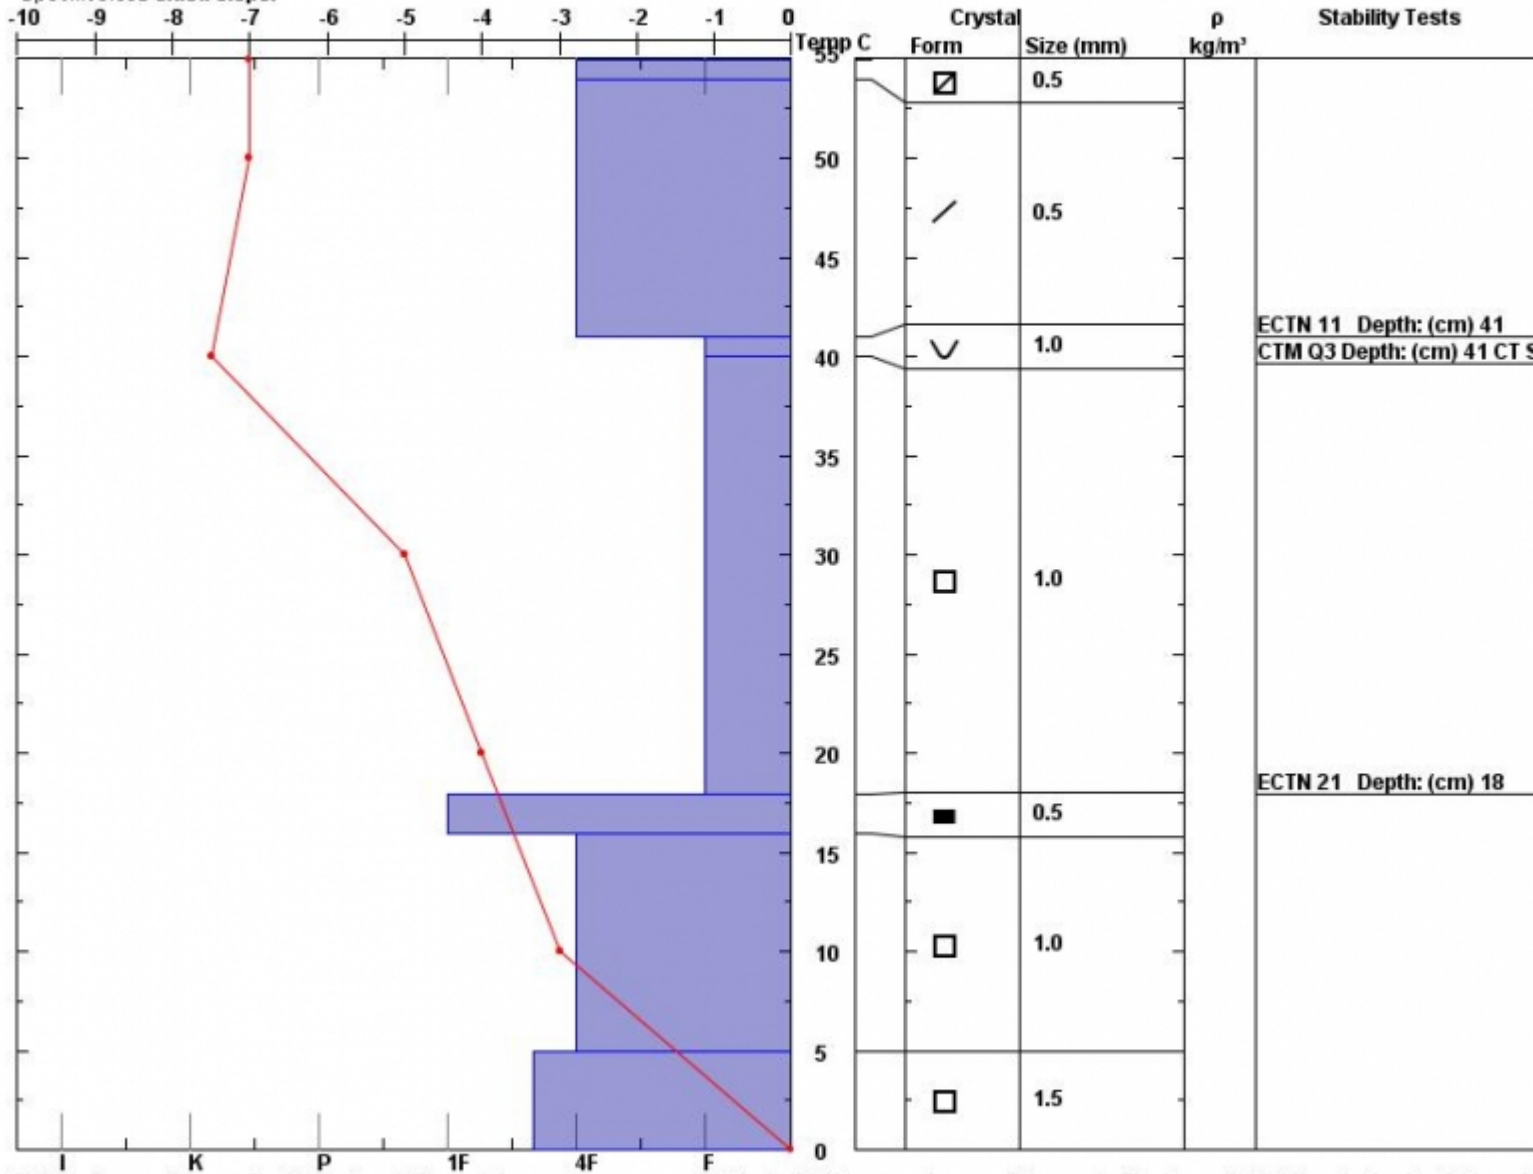

Precipitation: None

Wind: NW Moderate

PS10 HS55

Stability Test Notes:

Layer notes

Notes: Does not seem like there is a defined slab or any energy associated with the upper layers of the pack. The layer at 40-41 cm looked, acted, and surface hoar and looked decomposed and to be rounding. Clean fracture surface at 41 cm with a CT but no movement into the pit. ECT showed propensity to fracture within any specific layers. No collapsing or any other signs of instability noted.
