

Snow Pit Profile
Naya Nuki meadows
Bridger, MT
Elevation (ft) **8730**
Aspect: **45**
Specifics: **We skied slope.**

Observer: **Mark Staples**
Mon Nov 04 12:00:00 MST 2013
Co-ord: **N W**
Slope:
Wind loading: **no**

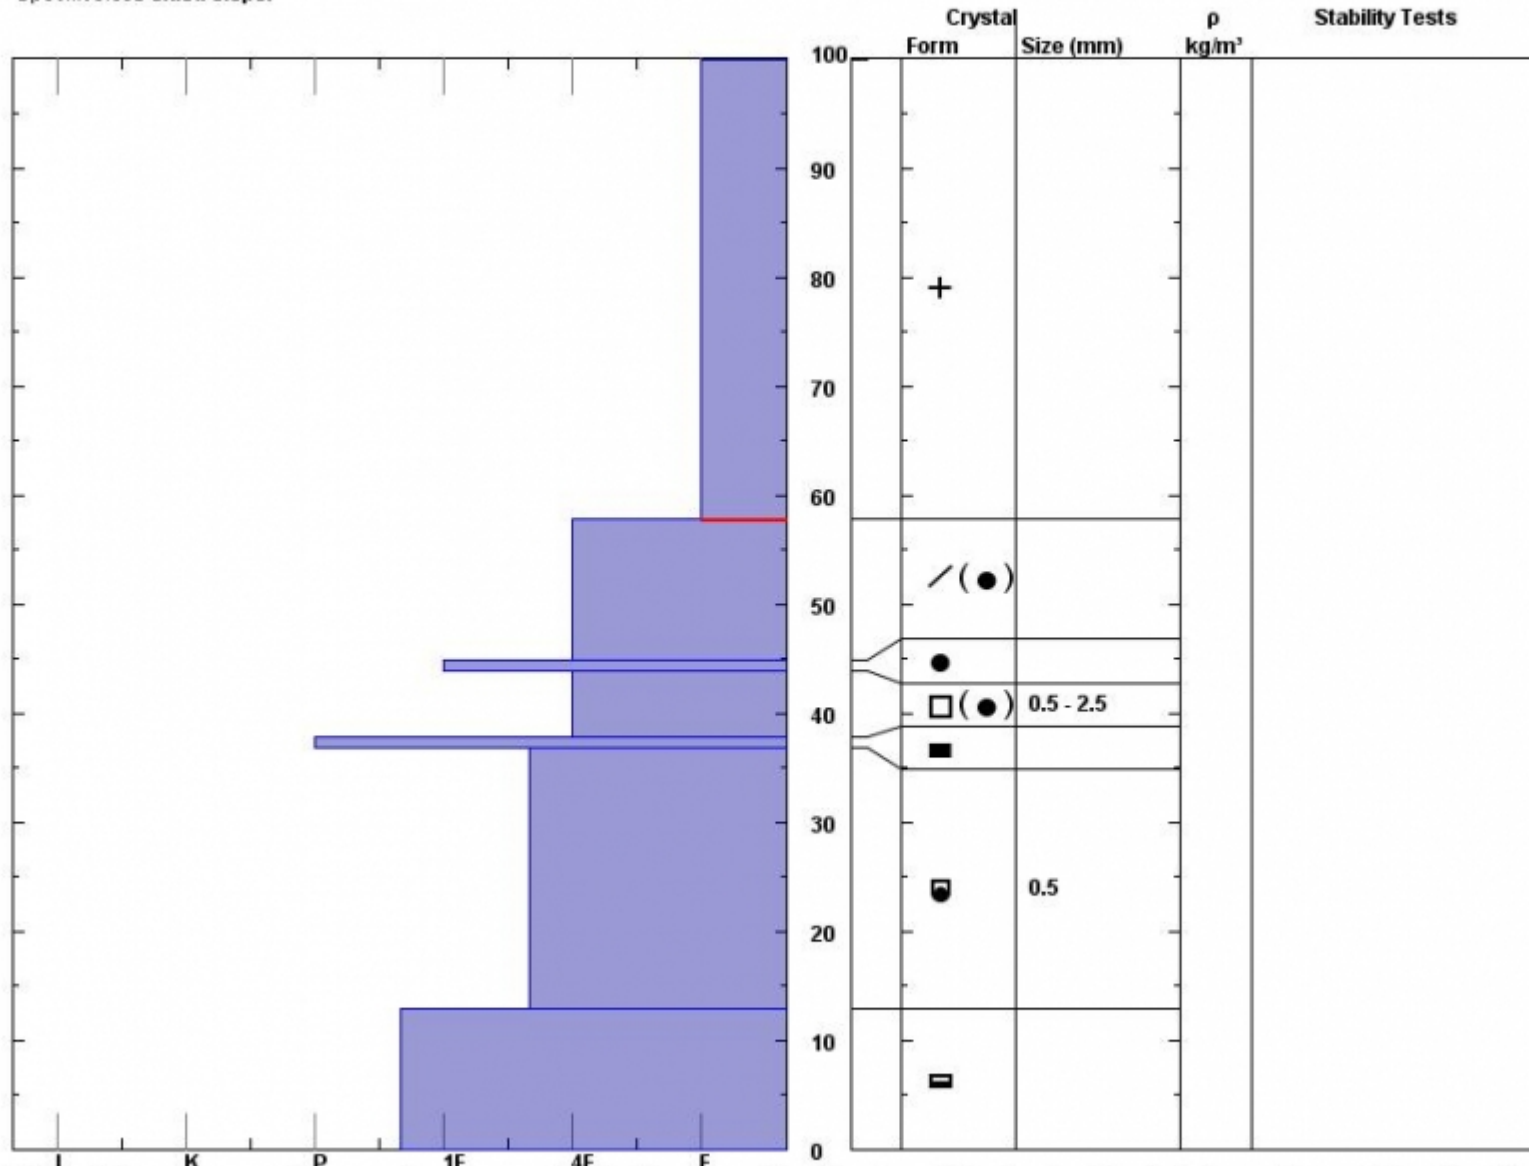

Stability on similar slopes: **Good**
Air Temperature: **C**
Sky Cover: **sky 4/8 to 8/8 covered**
Precipitation: **Snow < 0.5 cm/hr**
Wind: **Calm**

HS100

Stability Test Notes:

Layer note

58-100: Pr

Notes: Main concern was sluffing on steep slopes and wind slabs. Other pit locations have better developed facets between 44cm and 38cm. No collapse experienced. Visibility was poor and we could not see if there had been any natural avalanche activity.

Advisory Region
