Snow Pit Profile

Observer: Alex Marienthal

Air Temperature: -7 C

PF50 HS62

Stability Test Notes:

Layer note

Abelins BB Bridger, MT

Aspect:

Wed Nov 06 23:00:00 MST 2013

Wind loading:

Sky Cover:

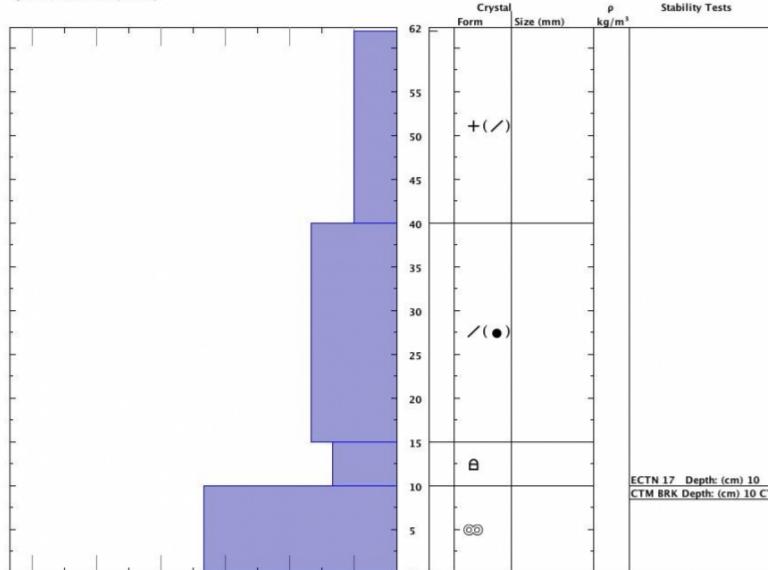

Co-ord: N W Elevation (ft) 8150 Slope: 34

Precipitation: Snow - 1 cm/hr

Stability on similar slopes: Good

Wind:

Specifics: Ski Area Pit; BC Pit;

I K P 1F 4F F

Notes: Snow surface temperature was (-6.5 C) just barely enough to create a temperature gradient for facet development. However, there was little evidence of the control o faceting. Crust was not seen to be problematic, but could be a bad combination with facets above.
