

## Snow Pit Profile

N of Bacon Rind

southern Madison, MT

Elevation (ft) 8350

Aspect: 95

Specifics: Collapsing, widespread. Collapsing, localized. Cracking. We skied slope.

Observer: Mason Young

Mon Jan 06 18:32:36 MST 2014

Co-ord: N W

Slope: 23

Wind loading: no

Stability on similar slopes: Poor

Air Temperature: C

Sky Cover: sky 3/8 to 4/8 covered

Precipitation: None

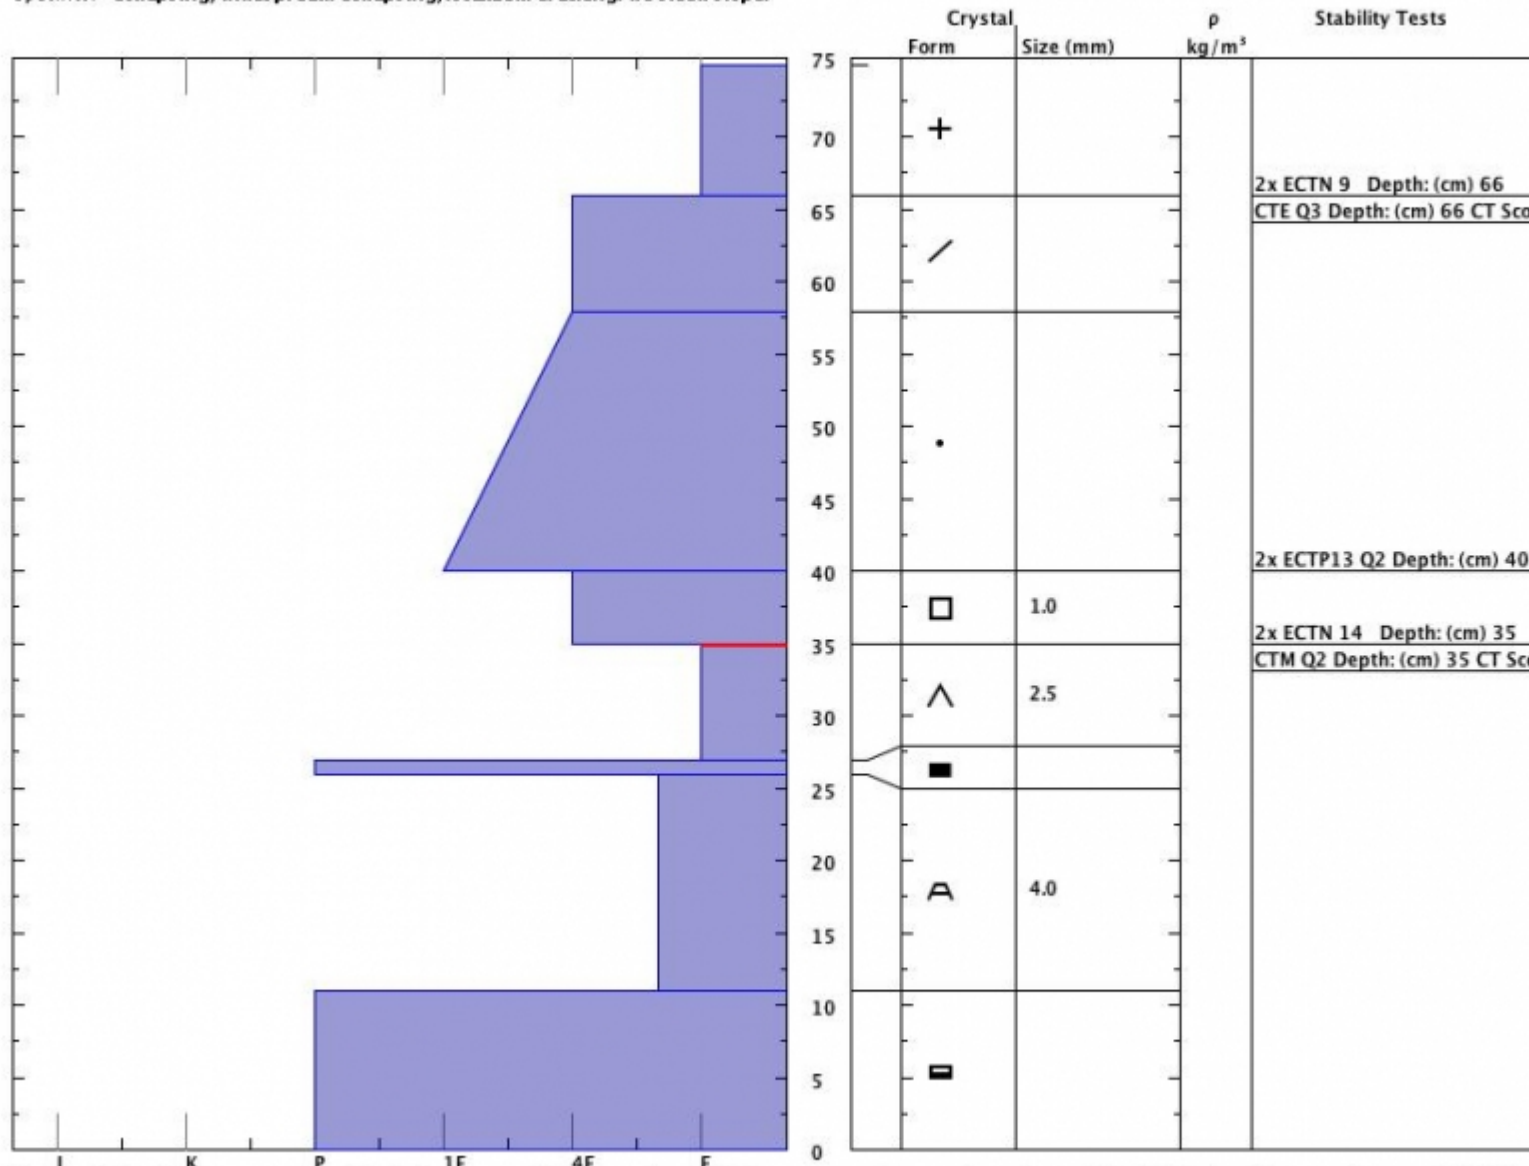

Wind: S Light Breeze

HS75

Stability Test Notes:

Layer notes

27-35: Pro

Notes: We're still most concerned with the fist facets at 35cm even though ECT's propagated on next layer above. CT's didn't fail on this upper layer, and did fail on the fist facets. Several large collapses and shooting cracks occurring on fist facets. We felt nervous on slopes above 27-28 degrees (measured).
