Snow Pit Profile Observer: Mark Staples Stability on similar slopes: Very Poor Stability Test Notes: Layer note Thu Jan 16 14:10:00 MST 2014 **Dogleg Chute** Air Temperature: C 17-38: Pro Co-ord: 45.83204 N 110.93613 W Sky Cover: Bridger, MT Elevation (ft) 8264 Slope: 38 Precipitation: Wind loading: no 10 Wind: Aspect:

I K P 1F 4F F
Notes: Cornice triggered avalanche. It broke at 38 cm. Not wind loaded. Pit on slope that didn't slide about 20 ft away did not show any problems in stall and snowpack looked very different
