Snow Pit Profile S Chutes - Frazier Observer: Mark Staples
Tue Jan 21 13:00:00 MST 2014
Co-ord: 45.92555 N 110.98409 W

Stability on similar slopes: Fair Air Temperature: C Stability Test Notes:

Layer note 35-42: Pro

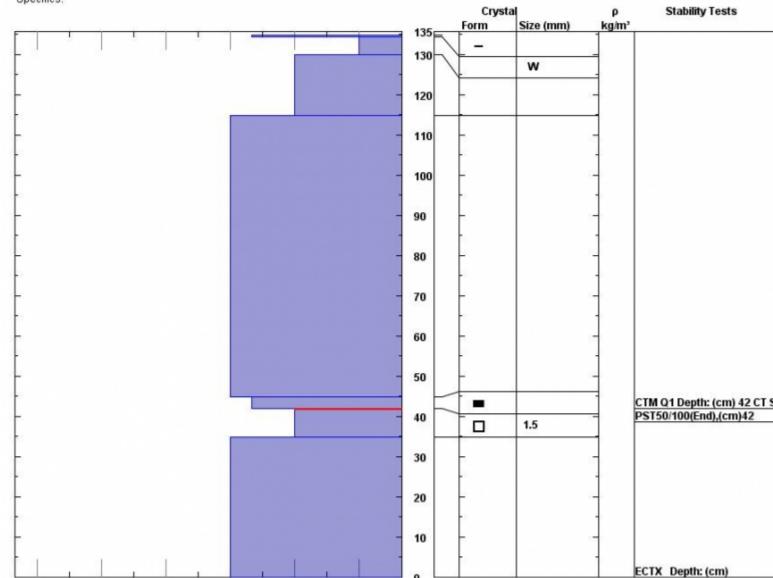

Bridger, MT Elevation (ft) 9020 Aspect: 152

Slope: 35

Wind loading: no

Sky Cover: Precipitation: Wind:

Specifics:

I K P 1F 4F F U
Notes: We dropped a few small cornices with no results. Seemed like it would be hard to trigger a slide, but I didn't want to trust the snowpack with the layer at 42 cm. the CT19 Q1 really popped out and the fracture had a sudden snap to it. Did a sideways pst (KPST). It propagated to the end 15/1
