

Snow Pit Profile  
**Sacajawaea Bowl**  
**Bridger, MT**  
 Elevation (ft) **8100**  
 Aspect: **120**  
 Specifics: **We skied slope. Supportable crust.**

Observer: **Alex Marienthal**  
**Thu Feb 18 12:55:00 MST 2016**  
 Co-ord: **N W**  
 Slope: **30**  
 Wind loading: **no**

Stability on similar slopes: **Good**  
 Air Temperature: **C**  
 Sky Cover: **sky 8/8 covered**  
 Precipitation: **Snow - 1 cm/hr**  
 Wind: **SW Strong**

**HS175**  
 Stability Test Notes:

Layer note

Notes: New snow and wind slabs are primary concern and bonded well with old snow surface/MF crust. Dug down to ground and found hard depth hoar problem in this area. Depth hoar may be a potential issue in steeper, shallower, and/or wind loaded areas, but we have had minimal activity on this mtn. range since Dec/early-Jan, even with larger storms.

Advisory Region
